

Lamcel Ceilings Advantages

- **Large Flat Panels**
- Lamcel Ceilings are available up to 5' x 5' square with maximum sizes up to 5' x 12'
- Lamcel Ceilings are extremely flat and will not pillow or sag even in a 5' x 5' grid in a mirror finish!
- Lamcel Ceilings are available in our Panel-LOK accessible suspension system
- Lamcel Ceilings are also available in traditional torsion spring, lay-in, or custom designed suspension systems
- Lamcel Ceilings are available perforated or not, in a variety of perforation patterns, with high acoustical performance
- Lamcel Ceilings are highly customizable
- Lamcel Ceilings are available in natural wood, in over 100 different wood species
- Available in virtually any metal finish available in sheet form
- Most common metal finishes used include aluminum (painted and anodized), stainless steel (#4, #8, textured, bead blasted), bronze, copper, zinc
- Lamcel Ceilings in a metal finish are incombustible, with flame and smoke <10
- Lamcel Ceilings are very light, weighing as little as 1 lb per square foot. This low weight makes for quick and easy installations
