

Lamcel Entrances

Advantages

- **Large Flat Panels**
- **Sizes available up to 5' x 12'**
- **Available in virtually any metal finish available in sheet form**
- **Lamcel Entrances are highly customizable**
- **The extreme flatness and wide range of finishes, adds a high quality highlight to any building entrance**
- **Most common metal finishes used include aluminum (painted and anodized), stainless steel (#4, #8, textured, bead blasted), bronze, copper, zinc**
- **The extreme rigidity of Lamcel Entrances means only minimal wall mounts are required**
- **For corner panels installed at ground level, Lamcel Entrances have a proprietary Titan Corner system for protecting panel corners from abuse**
- **The flatness of Lamcel Entrances allows the use of highly reflective finishes without any oil canning**
- **Lamcel Entrances are incombustible, with flame and smoke <10**
- **Due to their high rigidity, Lamcel Entrances are very firm when leaned on**
- **Lamcel Entrances are very light, weighing as little as 1 lb per square foot**
- **Using the Lamcel Entrances zipper attachment system, with a silicone joint, speeds up installations with a very clean look**
- **The large panel sizes, low weight, and minimal requirement for mounting means that Lamcel Entrances are quick and easy to install**
