

Lamcel Exoclad Advantages

- **Large Flat Panels**
- **Sizes available up to 5' x 12'**
- **The flatness of Lamcel Exoclad allows the use of highly reflective finishes without any oil canning**
- **Available in virtually any metal finish available in sheet form**
- **Lamcel Exoclad is highly customizable**
- **Lamcel Exoclad has been used extensively in large-scale custom curtain walls with wind load requirements exceeding 100 PSF**
- **Lamcel Exoclad is ideally suited for the entire building envelope, such as integrated into the curtain wall system, onto block wall or studs, glazed into wind units, exterior soffits and fascias**
- **Most common metal finishes used include aluminum (painted and anodized), stainless steel (#4, #8, textured, bead blasted), bronze, copper, zinc**
- **The extreme rigidity of Lamcel Exoclad means only panel perimeter attachment required**
- **Lamcel Exoclad is incombustible, with flame and smoke <10**
- **Due to its high strength rigidity, Lamcel Exoclad can be engineered for wind loads exceeding 100 PSF**
- **Lamcel Exoclad are very light, weighing as little as 1 lb per square foot**
- **Using the Lamcel Exoclad zipper attachment system, with a silicone joint, speeds up installations with a very clean look**
- **The large panel sizes, low weight, and minimal requirement for mounting means that Lamcel Exoclad is quick and easy to install**
