

Lamcel Panels Advantages

- **Large Flat Panels**

- **Sizes available up to 5' x 12'**
- **With the complete Lamcel Family of Walls, Ceilings, Entrances and Exoclad, the building cladding, canopy, vestibule, lobby walls and ceilings can be achieved with one unifying product from one source**
- **Lamcel Panels are extremely flat, without any oil canning pillowing or bowing, even in a mirror finish**
- **Lamcel Panels are highly customizable**
- **Lamcel Panels are designed into complete systems**
- **Most common finishes include aluminum (painted and anodized), stainless steel (#4, #8, textured, bead blasted), bronze, copper, zinc, natural wood veneer**
- **Lamcel Panels are incombustible, with flame and smoke <10**
- **Lamcel Panels are very light, weighing as little as 1 lb per square foot**
- **The large panel sizes, low weight, and rigidity minimizes the requirement for mounting making Lamcel Panels quick and easy to install**
